PROFILE

Computer Science graduate with a strong foundation in Data Science, Data Engineering, Data Analytics, Artificial Intelligence, and Software Engineering. Skilled in Python, SQL, Java, JavaScript, C#, PHP, and Dart, with hands-on experience in full-stack development, REST APIs, data pipelines, analytics dashboards, ML, and AI-powered applications. Experienced with React, Laravel, Flutter, FastAPI, Power BI, Databricks, PostgreSQL, MySQL, TensorFlow, and PyTorch. Strong problem-solving and analytical skills with a passion for building scalable, data-driven solutions and applying emerging technologies to real-world problems.

TECHNICAL SKILLS & COMPETENCIES

Programming Languages: Python, Java, JavaScript, C#, PHP, Dart, SQL

AI & GenAI: Generative AI, LLMs, NLP, Computer Vision, AI Agents, RAG, AI Application Development

Data Engineering & Analytics: ETL Pipelines, Data Modeling, Data Warehousing, Medallion Architecture, Databricks, Apache Spark, Power BI, Data Visualization, Dashboard Development

Software Development: OOP, Data Structures & Algorithms, Full-Stack Development, REST APIs, React.js, Laravel, Flutter, FastAPI, MERN, PERN, Git/GitHub

Data Science & ML: Data Analysis, EDA, Data Preprocessing, Feature Engineering, Predictive Modeling, ML, DL, Scikit-learn, TensorFlow, PyTorch

Soft Skills: Problem Solving, Analytical Thinking, Communication, Teamwork, Leadership, Time Management, Critical Thinking

EDUCATION QUALIFICATIONS

Staffordshire University, UK

Bachelors (Hons) Degree in Computer Science

First Class
(2023 - 2026)

- Selected Coursework & Results:

- Final Year Project: 84% (AI, ML, Data Analytics, Data Engineering)
- Data Analytics: 78% (Data Analytics, Data Engineering)
- Emerging Technologies: 81% (AI, ML, DL, LLM, Data Analytics)
- Software Development and Application Modeling: 88% (Software Engineering)
- Server-Side Programming: 81% (Software Engineering)
- Enterprise Cloud and Distributed Web Applications: 83% (AWS)

British Council

British Council English Course

2022

St. Anthony's college, Kandy

General Certificate of Education Ordinary Level Examination

2016

General Certificate of Education Advanced Level Examination

2019

ACADEMIC PROJECT EXPERIENCE

Completed university and personal projects spanning data engineering, data analytics, machine learning, artificial intelligence, business intelligence, software engineering, and full-stack development. Gained hands-on experience in application development, database management, REST API development, data processing, ETL pipelines, data analysis, machine learning, AI integration, dashboard development, and building scalable, data-driven solutions to address real-world problems.

PROJECTS

AI/ML-Based Personalized Diet and Nutrition Assistant	2025 – 2026
Developed an AI-powered personalized diet mobile application using Flutter, FastAPI, and Python, integrating machine learning models, food image recognition, calorie estimation, and personalized meal recommendations with scalable backend APIs.	
AI SaaS Application (PERN Stack)	2026
Developed an AI-powered SaaS platform using the PERN stack, implementing user authentication, subscription billing, and AI-driven features including article generation, image processing, and resume analysis with efficient backend data management.	
AI LinkedIn Post Generator Application	2026
Developed a Generative AI application using Python, Streamlit, and LLM APIs to analyze LinkedIn posts, extract writing patterns, topics, and styles, and generate personalized content using prompt engineering and few-shot learning techniques.	
Multi-Agent AI Software Development Assistant	2026
Developed a multi-agent AI coding assistant using LangGraph, Python, and Groq Llama models to generate software projects from natural language prompts with automated planning, architecture design, and code generation.	
FMCG Data Engineering Lakehouse Platform (Databricks, Apache Spark)	2026
Developed a Lakehouse platform using Databricks, Apache Spark, and AWS S3, implementing ETL pipelines with PySpark and SQL using Medallion Architecture. Built data models and analytics-ready datasets for BI reporting.	
Transportation Data Engineering Pipeline (Databricks Lakeflow SDP, Apache Spark)	2026
Developed a data engineering pipeline using Databricks Lakeflow SDP, Apache Spark, and Delta Lake, implementing Medallion Architecture with PySpark and SQL for data processing, transformation, and analytics-ready datasets.	
Shopify Sales Analysis Dashboard (Power BI Dashboard)	2026
Developed a Power BI dashboard to analyze Shopify sales data, performing data cleaning, transformation, and analysis. Created visualizations for revenue trends, customer behavior, product performance, and key sales insights.	
Hospital Emergency Room Analysis Dashboard (Power BI Dashboard)	2026
Developed a Power BI dashboard to analyze hospital emergency room data, applying data cleaning and transformation techniques. Created KPI visualizations to identify trends in wait times, admissions, satisfaction scores, and referrals.
